Skills Summary

- **Languages:** SQL, Python, R, C/C++, Pandas, NumPy, Matplotlib, Scikit-learn
- **Data & Cloud:** AWS, Spark/PySpark, DuckDB, PostgreSQL, MySQL, Supabase, Parquet, Excel
- **Visualisation & BI:** Power BI (DAX), Tableau, QuickSight, Streamlit, Jupyter
- **Automation:** Automated Reporting, ETL Automation, Data Validation, Web Scraping, Apps Script, GitHub Actions
- **AI Tools:** Claude API, Gemini API, Structured Outputs, Prompt Engineering, LLM Guardrails
- **Soft Skills:** Stakeholder Management, Process Improvement, Communication, Leadership

Education

- **Delhi Technological University (DTU)** — Delhi, India
  Bachelor of Technology - Mathematics and Computing Engineering; CGPA: 6.42/10 — *Nov 2022 - June 2026*
- **Nutan Vidya Mandir School**
  Class XII (CBSE); Percentage: 84% — *2022*

Experience

- **Policybazaar for Business** — Gurugram
  Business Analyst — *June 2026 - Present*
  - **Stakeholder Management & Revenue Strategy**: Work with sales and renewal stakeholders across a multi-crore B2B insurance portfolio, building strategies to maximise revenue and tracking renewal and RFQ performance.
  - **Reporting Automation**: Built automated emailers in Google Apps Script and self-updating dashboards inside Google Sheets, pulling renewal and booking data from AWS with SQL and replacing manual reporting cycles.
  - **PBB Signals - Lead Generation**: Built a Python web-scraping tool that monitors news sources for IPOs, funding rounds, hiring expansion and CXO changes and writes each signal to a shared Google Sheet, giving sales a timely, company-specific reason to reach out.
  - **Fraud Analysis & Lead Sourcing**: Analyse data to flag fraud patterns and source new corporate leads for sales.
- **TrainX** — Gujarat, India
  Data Analytics Instructor (Contract) — *April 2026*
  - **Training Delivery**: Delivered 140+ hours of instructor-led training in SQL, Python, Power BI, and Excel to 70+ MBA students, covering data cleaning, EDA, dashboard automation, and end-to-end analytical workflows.
  - **Mentorship**: Mentored students through assignments, capstone projects, and mock interviews, helping them become placement-ready within 30 days while collaborating cross-functionally with faculty.
- **OUTCAST** — Noida, Delhi NCR
  Operations & Analytics Intern — *June 2025 - Aug 2025*
  - **Operations Support**: Managed 500+ orders and maintained 5,000+ customer records, supporting efficient warehouse operations and customer fulfillment processes.
  - **Automated Dashboards**: Developed 5+ automated Power BI dashboards tracking revenue, inventory, and customer KPIs, contributing to a 15% increase in revenue and an 18% reduction in excess inventory worth 2+ lakhs.

Projects

- **EIOS - Enterprise Intelligence Operating System**: Built a single-source-of-truth reporting system that pulls 4 Google Sheets into DuckDB and generates a dashboard, automated emails, live-formula Excel packs and PowerPoint decks from one shared config of 29 KPI definitions, so every report shows the same number; handled messy hand-maintained data (mixed date formats, ragged rows, text currency) and validated accuracy with a 176-check offline test suite.
  Tech: Python, SQL, DuckDB, Streamlit, Parquet, Excel
- **Rehaul - Resale Marketplace with a Database-First Backend**: Built and launched a live resale shop where all business rules run inside PostgreSQL: Row Level Security on every table, an order state machine enforced by triggers, a partial unique index that prevents double-selling, and 6 analytics views (KPIs, category performance, repeat buyers) powering the admin dashboard; CI runs 25 unit + 49 pgTAP database tests before each deploy, with weekly encrypted backups. Runs at zero monthly cost on free tiers.
  Tech: PostgreSQL, Supabase, pgTAP, JavaScript, Cloudflare Pages, GitHub Actions — Live: rehaul.pages.dev
- **tailortex - LLM Resume Tailoring with Guardrails**: Open-source CLI and Streamlit app that tailors a LaTeX resume to a job description using Gemini structured outputs; edits are spliced into exact character spans so the template is never broken, guardrails block invented numbers, tools and skills, and the compiled PDF is trimmed to one page automatically. 50 pytest tests.
  Tech: Python, Gemini API, Pydantic, LaTeX, Streamlit, Docker — Live: tailortex.streamlit.app

Achievements & Leadership

- **Awarded Pre-Incubation Support - DTU Innovation & Incubation Foundation (2025)**: Selected for DTU IIF's pre-incubation program for an early-stage car rental venture; led and mentored a team of interns.
